

# Bekaert ZA High Strength Horse Fence

**Quality, long life and great value are combined in the new Bekaert ZA High Strength Horse Fence.**

Bekaert ZA High Strength Horse Fence is the latest innovation in the most attractive line of horse fence available on the market. With our new Zinc-Aluminum (ZA) coating, Bekaert ZA offers long life at a great value.

Our 2"x4" non-climb horse fence maintains an attractive appearance while being durable and safe for your animals. The "S" knot firmly secures the horizontal line wires to the vertical stay wire and is smooth to protect the horse's skin and coat.

Using high strength steel means Bekaert ZA is much stronger than a traditional low carbon non-climb horse fence. Our fence will stay tight and strong for years with minimal maintenance.

If you are looking for a non-climb horse fence that will look great and perform even better, look no farther than Bekaert ZA High Strength Horse Fence.

# Bekaert ZA High Strength Non-Climb Horse Fence is the ultimate solution for high quality and long life at an affordable price.

Bekaert ZA High Strength Horse Fence is offered in our new ZA (95% Zinc - 5% Aluminum) advanced coating, developed and produced exclusively by Bekaert. Salt spray testing performed according to ASTM B 117 has demonstrated corrosion resistance two to three times greater than Class 1 galvanization. With our new ZA coating Bekaert maximizes fence life as well as value.

Our horse fence is animal friendly and features a safe and secure “S” knot to protect your animal’s skin and coat. The “S” knot is smooth to the touch yet strong enough to resist animal impact. Also, its 2”x4” opening prevents your horses from getting tangled in the fence.

The use of high strength steel for our 12.5g line and 14g vertical stay wires mean our fence is not only stronger, but also easier to install because of its lighter weight. Once properly installed, Bekaert ZA High Strength Horse Fence remains tight for years, with reduced sagging and stretching, plus little to no maintenance so you can spend less time worrying about your fence.

Part Number	Fence Design	No. of Line Wires	Height	Vertical Stay Spacing	Roll Length	Top and Bottom Wire Diameter	Main Wire Diameter	Stay Wire Diameter	Roll Weight	Finish
164395	1348-2	13	48"	2"	100'	12.5g	12.5g	14g	101 lbs	ZA
164396	1348-2	13	48"	2"	200'	12.5g	12.5g	14g	198 lbs	ZA
165397	1660-2	16	60"	2"	100'	12.5g	12.5g	14g	125 lbs	ZA
165399	1660-2	16	60"	2"	200'	12.5g	12.5g	14g	246 lbs	ZA
165031	1972-2	19	72"	2"	100'	12.5g	12.5g	14g	138 lbs	ZA

## Features

- Innovative Zinc Aluminum (ZA) coating
- High Strength Steel Wire
- 2”x4” opening with safe and secure “S” knot

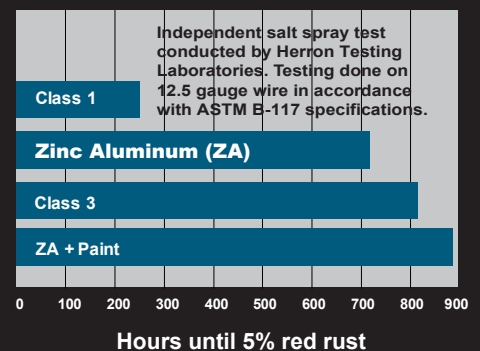

## Benefits

- Longer life expectancy than Class 1 galvanized
- Stronger than Low Carbon
- Reduced sagging and elongation
- Easier installation
- Increased post spacing
- Safe for horses
- Lower Maintenance
- Overall reduced cost of ownership

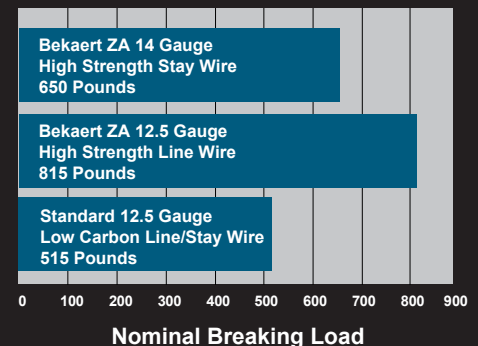

BEKAERT
